J. G. KIMBALL, *City Treasurer.*

Nashua, Feb. 21, 1867.

City of Nashua, Feb. 21, 1867.

The undersigned, the Committee on Finance of the City Council of said City, certify, that in accordance with the provisions of an ordinance of said City, we have this day examined the foregoing account of John G. Kimball, City Treasurer, and find the same to be correctly cast, and each payment properly vouched by a Treasury Order for the same corresponding in amount with the vouchers in the hands of the City Clerk.

We have also examined the sources from which the income of the past year has been derived and are satisfied that he has charged himself with the whole amount paid into the Treasury.

We find that the total receipts into the Treasury during the past year, including fourteen thousand eight hundred fifty-four dollars and seven cents ($14,854 07) on hand at the commencement, have been two hundred thirty-five thousand one hundred twenty-four dollars and sixty-eight cents ($235,124 68).

The total payments during the same time have been two

hundred forty-two thousand six hundred thirty dollars and nine cents ($242,630 09) leaving balance in the Treasury this day seven thousand three hundred forty-eight dollars and sixty-six cents ($7348 66) which has been shown and counted.

REPORT

OF THE

CHIEF ENGINEER OF FIRE DEPARTMENT.

City of Nashua,
Fire Department Feb. 16, 1867.

To the Honorable Board of Mayor and Aldermen:

Gentlemen — In conformity with section six of an Ordinance relating to the Fire Department, I herewith transmit to you my Annual Report.

The machines and apparatus belonging to the City and in use for the extinguishment of fires are in good order excepting some of the hose is poor and not reliable.

The loss by fire during the last year has been less than $6,000 00. The Department has been called out by alarm of fire ten times.

The Engine Houses have been painted this last year, and 600 feet new hose bought.

I would recommend the appropriation for the Fire Department the present year, $1,500 00 to meet the demand for new hose.

I return my thanks to the officers and members of the Fire Department.

Very Respectfully Submitted,
ISAAC EATON, Chief Engineer.

REPORT OF THE BOARD OF HEALTH.

City of Nashua, March 1, 1867.

To the Honorable Board of Mayor and Aldermen:

The Health officers of the City of Nashua herewith respectfully submit their Report for the current year:

Having received instructive suggestions from your Honorable Board, and numerous and urgent solicitations from many of the most influential citizens to thoroughly inspect the City, and remove all those causes which tend to promote the introduction and propagation of pestilential diseases, the Board of Health, in view of an expected visitation of cholera, determined on a more vigorous course of action than has usually been thought necessary in years past. Circulars were therefore issued with orders in reference to local conditions and the duties of the people, with such suggestions relative to sanitary means as were designed to commend these orders to the good judgment of all interested. All parts of the City were then visited, and each officer took special supervision of his allotted district. It is proper and gratifying to say, that in a very large majority of cases, the orders were cheerfully complied with. In a few cases legal notice was necessary; some of these, however, were non-residents and not personally interested. The general health of the City for the past year has been comparatively good. There were a few cases of cholera, but they were not of a very malignant character. Typhoid fever and dysentery were less prevalent than usual, and it is reasonable to suppose that the observance of sanitary regulations had the effect to lessen the frequency, and mitigate the violence of those diseases.

At the commencement of the year there were more than twenty places in the different parts of the City, where there was more or less small pox. Several places were found where the disease had been kept secret, and public exposure and spread of the contagion had been the consequence. By a rigid enforcement of the rules in all cases, in less than two months the City was entirely rid of the disease. Meanwhile, a small building had been erected on the City Farm for a pest house; but before its completion there were no tenants seeking occupancy. Small pox, although so universally dreaded, is one of the least alarming of all diseases, for the reason, its habits are so well known, and a positive preventive is so easily available.

In conclusion, the Board of Health would recommend a perpetual enforcement of all reasonable sanitary laws and requirements, and that these rules may be perfected and increased from time to time, as the public good or occasion may require. Let the duties of the Health Officers be extended to the examination in relation to the ventilation of public buildings, halls, lecture rooms, churches and school houses, to the end, that the disastrous practice of letting down windows to expose the sides and heads of people and scholars in near proximity, may give place to a more safe and rational method.

The system of drainage in the City is as yet very imperfect. The want of suitable drains to carry away impure and waste water has been noticed in many parts of the city, and the subject is recommended to the attention of the government as worthy of consideration. All of which is
